- ✔ **Thousands of quests** – easy to find and range in difficulty!
- ✔ Take advantage of the **pran pet system** – never battle alone!
- ✔ **Craft your own weapons!**

## In Aika Online You Participate in Massive PvP Battles

One of the major things that Aika Online is known for is its huge PvP battles. These battles between players can consist of up to one thousand characters, making it an all out war experience. There are different ways to battle; battles when players fight for control of an entire Nation and other battles when players will attack enemy Nations for magical artifacts. Aika Online is very PvP heavy, and much of the storyline will be based around these wars between enemy Nations.

## Undertake Thousands of Quests in your Aika Online Journey

While PvP is Aika Online's main feature, there is still plenty to do for individual gamers. There are thousands of quests, some related to the plot, some that are PvP based, class based quests, and others that are fun side quests. These quests give players a variety of rewards, including experience, money, new equipment, and even

pets. The quests are in-depth and give players solid instructions on what to do. Later on in the game, there are even quests for entire guilds or nations to undertake, making the quest system very unique.

## The Fun and Unique Pran Pet System

This Aika Online Review shows, you will never play alone! Every player has the ability to get a Pran very early on, choosing from water, wind, or fire. Each Pran starts out as a tiny fairy. The player will then travel with the Pran pet, completing quests. The pet will help the player by casting beneficial spells or attacking the enemy. As the player levels and grows, the pet grows as well. Perhaps most interesting is that it will even develop a personality based on how the gamer treats the Pran. Pets can turn out to be cute, tough, smart, mean, sassy, or even spunky.

## Various Crafting and Enhancement Options

Aika Online has various different ways to create and boost equipment, such as weapons, potions, and armor. By crafting new weapons and upgrading them with enhancements, players can create a very effective and powerful piece of equipment. Creating weapons requires that players have a variety of materials, which can be looted off of enemies, acquired through quests, or found. Equipment can then be enchanted by using precious stones. Each precious stone can have a different effect, such as increasing attack power or armor level.
